I. Acknowledge

As we understand that the eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips! To appreciate the fact, we have created a website for a salon so that customers can easily find the necessary information about the services and products offered by the store. This site will allow you :

- ✓ Customer care services
- ✓ The products are currently sold in the salon
- ✓ Online ordering service
- ✓ See what products are coming out in the future

With the features that I have given, we are committed to bringing convenience to customers in using the website for many different purposes while ensuring a smooth search for information

Beside several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in web developing world

We would like to send a great thank to our professor and other students for the support during the time in project

We withal thank you so much for your information and the “demo” project from India APTECH to avail us get more authenticity experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more prosperous in the future.

Best wishes - Group

II. Synopsis

This project has helped us have a more practical view in applying the knowledge we have learned in HTML5/JavaScript. These applications also broaden our understanding and practical experience in the application.

The project we made this time is the clearest practical example for practical application. Our goal in the project was to show you that it's relatively easy to build a website with the basics.

From there you can apply them to develop more widely and to a higher level as we are currently researching and developing.

Website in this project allows users to find information about services and products being offered by the salon

III. Problem Definition

SIMPLON's Beauty care center is a very large cosmetics and accessories store in the city. With the success of the store, the owner opened several more stores in different cities. Simplon products are known for the quality of service they are providing since 1985. To advertise the company and also to start online services, the company wanted to make its website.

Here are some issues that need to be addressed:

- 1) The product is already very popular in the market and sales are increasing, there are still some customers who want to see the product, learn about the types that are served and sold by the store.
- 2) Some customers may also want to order online for ease of use without having to go to the store to buy.
- 3) Limit the fact that the product line is not known to many customers, they order only on the basis of feedback or recommendations of their friends or colleagues and after

delivery the product does not match their requirements or expectations Waiting leads to wasted time, resources and delivery costs.

4) When customers need support from service and product providers or feedback on it. We will also design a separate feedback page for customers' convenience about this as well as a phone number for urgent online consultation.

IV. Design Ideas

SIMPLON's Beauty care centre is very big shop of cosmetics and accessories in the city. With the success of the shop, owner had opened few more shops in the different cities also. Simplon product is known for their quality of the service which they are providing since 1985. In order to advertize about the company and also to start online services the company wishes to make the website of the company. So because of that, they hired us to make a website for their online marketplace.

The design will include our products and services that we are doing right now in our care center. It will be designed for every customer that wants to know about our service. It will be very simple and easy to use.

V. Service Details

First of all, let us introduce our service for your hair. We can dye your hair with a safe color that doesn't cause harm to your hair.

We are committed to using safe hair dyes for the health of our customers. Besides, we also have a repair service to restore damage after dyeing for customers who are accidentally allergic to hair dye.

Second, about nails. We have an artist team to take care of this. You won't have to worry about the art you get in the final result. It will be very good. As with hair dye, our nail polishes are clean quality products from local brands that are critically acclaimed. We also support repair of image changes after painting within 14 days.

Last but not least, skins. Yes, we are using genuine goods from local brands for the best experiment for your skin and to make sure that you won't feel a thing in all the process. Human skin is extremely sensitive and we know it. Our skin products ensure

safety rules for the health of our customers' skin, without causing allergies or any other side effects. However, if you have allergies and do not know which type to choose, please contact us immediately for advice on choosing the right product

VI. Product Details

Along with the above services, we also provide other high-end products such as makeup sets, nail polish, jewelry, wedding sets. We also plan to develop watches for men in the future.

All current and future products are available for purchase. You can find more details in the upper left section of the website. All products can be purchased online. Also for more information. Customers need to know more details, they can come to the store for more advice from our staff.

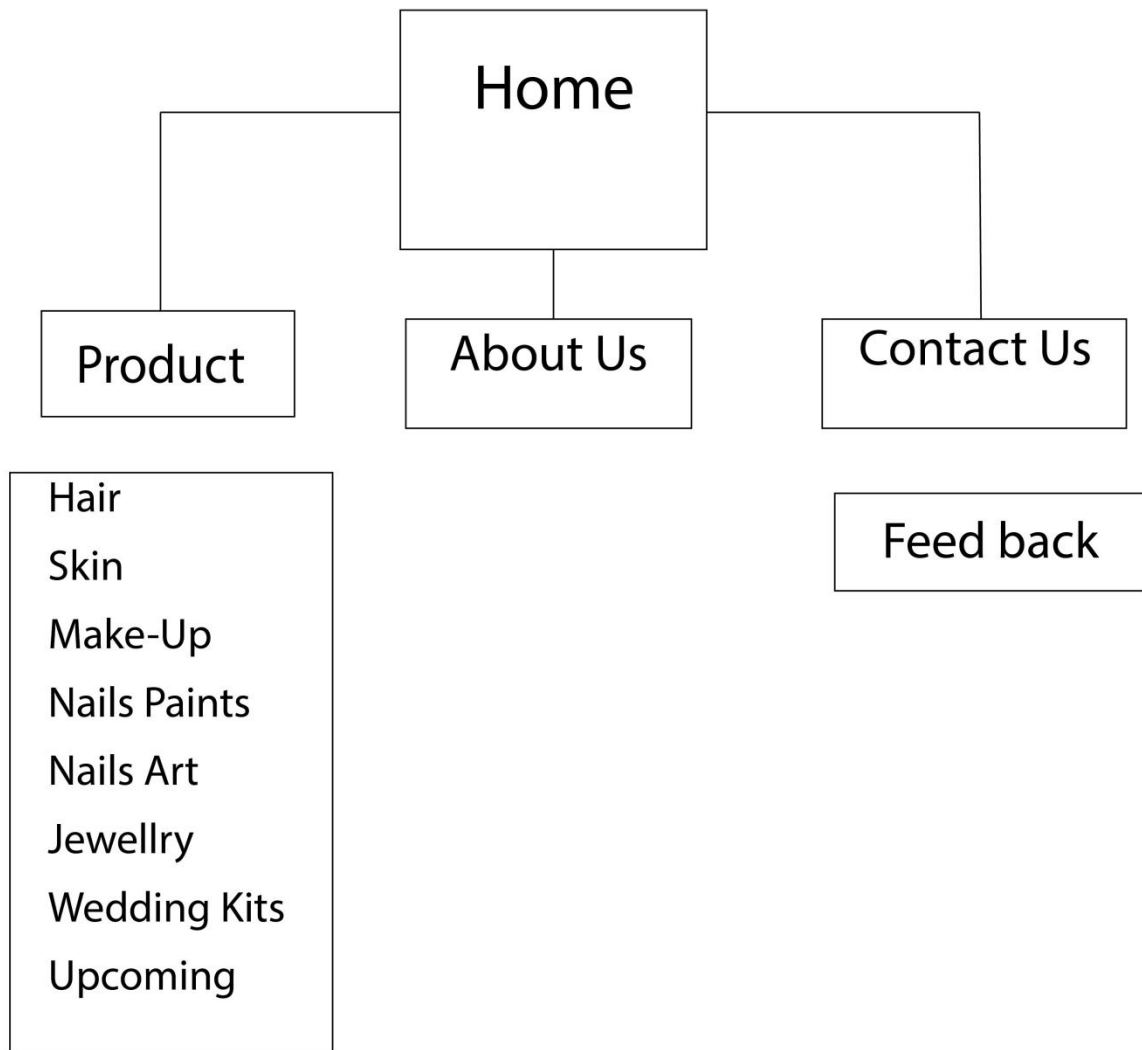

VII. Customer Requirements Specifications

USER:
Input: Input customer's email , phone number Input customer's comment about products
Process: Collect customer's mail Check the authenticity of information Prepare a compensating product if there is a warranty
Output: Reply as soon as possible Support delivery service to renew defective products

WEB MASTER:
Input: Control website database, input product information,...
Process: Analyze website
Output: Website interface, images, forms, ... Giving interaction

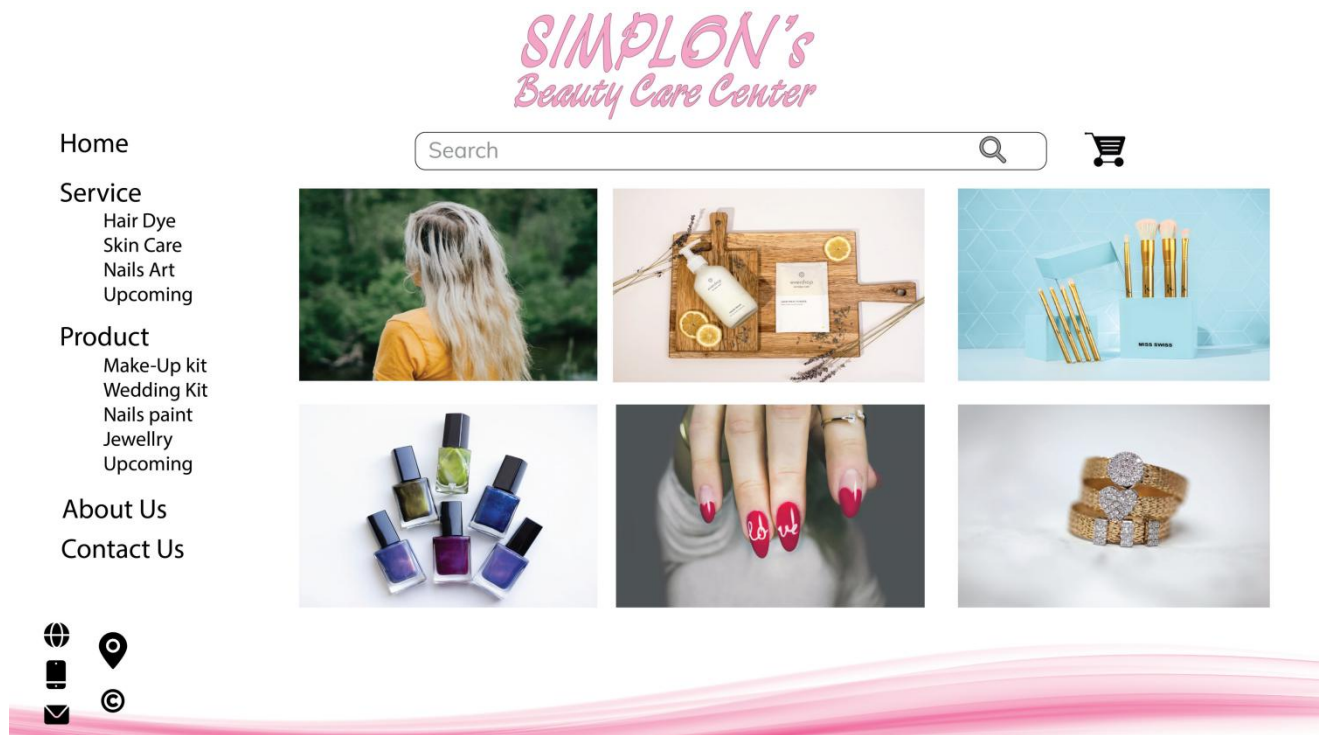

HARDWARE / SOFTWARE REQUIREMENT:
Software: HTML editor Javascript
Hardware: A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better 64 Megabytes of RAM or better
